

## **HIS LORDSHIP'S HOLE**

### **Saturday/Sunday 16/17 January 1999**

JCB dig. Entrance uncovered below a red marl cliff-face at a depth of 15'. Vertical rift visible beyond a blocking boulder to the right. 45% pipe "shaft" installed.

### **Tuesday 19 January 1999**

Tony Jarratt banged a boulder to the left - the wrong boulder!

### **Wednesday 27 January 1999**

Cleared bang debris and other infill. Removed the blocking boulder, but a constriction prevented access to the rift.

Stones seemed to bounce down for 25' or so.
